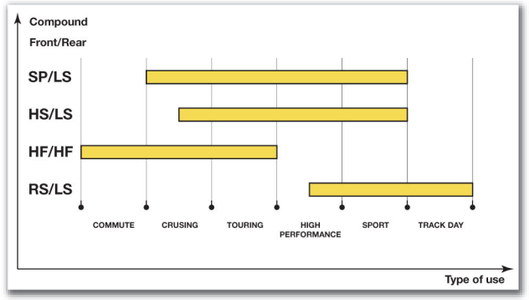
HOW TO CHOOSE
YOUR BRAKE PADS

GO AHEAD

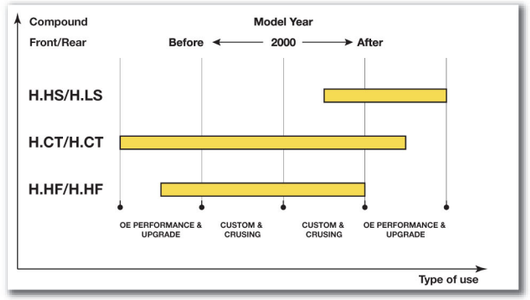
THE RIGHT CHOICE FOR YOUR MOTORCYCLE AND YOUR RIDING STYLE.

1. Choose your motorcycle type "Street Motorcycles", "American Motorcycles", "Scooter", "Road Racing", "Off Road", "ATV".
2. Find your "Type of use" in the matching diagram.
3. Pick the compound matching your needs and requirements.
4. Go to the "Motorcycle Model Applications" section to find your bike and matching SBS brake pad numbers.

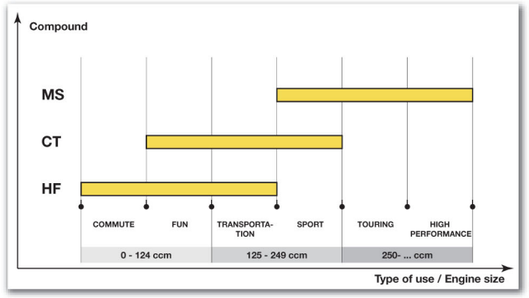
STREET MOTORCYCLES



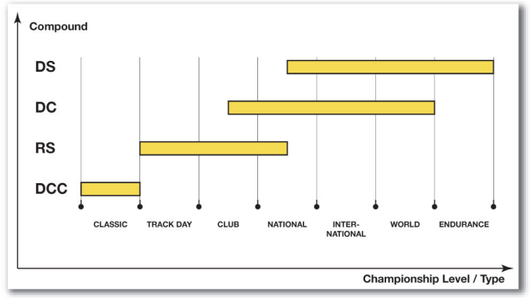
AMERICAN MOTORCYCLES



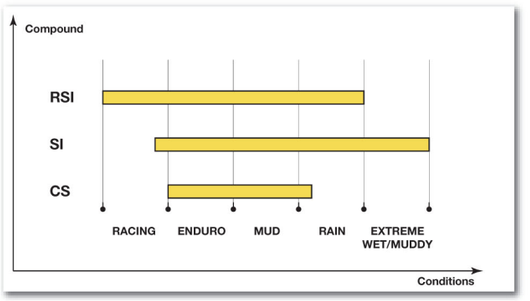
SCOOTER



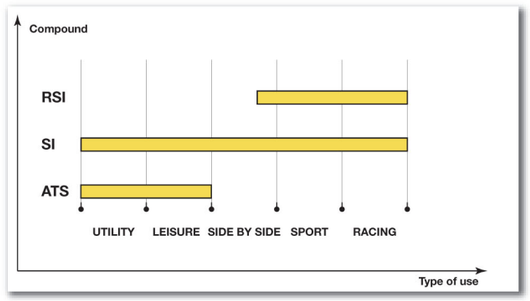
ROAD RACING



OFF ROAD



ATV



Choose ATS compound for older Arctic Cat and Polaris with **plain steel discs**.

WELCOME TO OUR UNIVERSE

SBS Friction A/S is a Danish based company that develops, produces and markets brake pads and friction solutions for motorcycles, scooters, ATV/UTVs, special cars and industrial applications including wind turbines.

Further, our product range includes other brake components such as brake discs, brake shoes and accessory parts such as brake pins.

Our history goes back to 1964. In the 1970s we were the first to introduce aftermarket disc brake pads for motorcycles. Since then we have continuously expanded our range, and our market coverage is almost complete no matter make, model or year. We are first with the newest and last with the oldest.

We are number one 1 in the European aftermarket for motorcycle brake pads, and all over the globe the SBS name is known for braking excellence. Totally, our distribution network is spread to around 50 countries around the world including USA, Canada, Japan, Australia and the European Union.

Our customer portfolio comprises motorcycle industry OEMs such as brake system and vehicle manufacturers, and due to our friction know how other industries such as wind turbines manufacturers.

Our headquarters, R&D, production and sales are located in Svendborg, Denmark. Our production plant features around 12,000 sqm with production lines for ceramic, sintered and carbon material components.

We employ around 200 people and our turnover has increased steadily since we introduced our first brake pad.

BIENVENUE DANS NOTRE UNIVERS

SBS Friction A/S est une société danoise qui développe, produit et commercialise des plaquettes de frein et des solutions de friction pour les motos, les scooters, les quads ou autres véhicules TT, les véhicules spéciaux et les applications industrielles comme les éoliennes.

Notre gamme de produits comprend en outre d'autres composants de freinage comme les disques de frein et les segments de frein, mais aussi des accessoires comme les axes de frein.

Notre histoire a commencé en 1964. Dans les années 1970, nous avons été les premiers à proposer des plaquettes de frein de rechange pour les motos. Depuis, nous avons continué à développer notre gamme et notre couverture du marché est aujourd'hui pratiquement totale, quels que soient la marque, le modèle ou l'année. L'innovation est notre marque de fabrique !

Nous sommes numéro un sur le marché européen du rechange en matière de plaquettes de frein pour les motos et la marque SBS est synonyme d'excellence de freinage partout dans le monde. Au total, notre réseau de distribution est présent dans près de 50 pays répartis sur toute la planète, y compris aux États-Unis, au Canada, au Japon, en Australie et dans l'Union Européenne.

Notre portefeuille de clients regroupe des OEM du marché de la moto comme des fabricants de systèmes de freinage et des constructeurs automobiles, mais aussi, grâce à notre savoir-faire en matière de friction, des constructeurs d'éoliennes.

Notre siège social, notre service R&D, notre site de production et notre service commercial se trouvent à Svendborg, au Danemark. Notre site de production s'étend sur près de 12 000 m² et nos chaînes produisent des composants en céramique, frittés ou en carbone.

Nous employons près de 200 personnes et notre chiffre d'affaire n'a fait qu'augmenter avec une belle régularité depuis la production de nos premières plaquettes de frein.

WELCOME TO OUR UNIVERSE

FRICTION IS TOO IMPORTANT TO LEAVE TO OTHERS

Therefore we manage all crucial processes, such as product development, testing, mixing, pressing, controlling, packing etc. “in-house”.

We consider innovation, productivity and quality assurance as core competencies.

We continuously develop new friction materials, new products, new production methods and advanced process technology. Our production lines are state-of-the-art and our operations highly automated.

All workflows are LEAN based, focusing strictly on the needs of our customers for high and consistent quality, full flexibility and excellent delivery performance. Our experienced and well trained staff ensures high efficiency in all processes, from compound mixing to packing.

Our R&D continuously innovates with new materials and technologies to achieve ultimate performance, longer lifetime, higher comfort and more eco-friendly brake products.

We meet the requirements of both aftermarket and OE customers, and our products are approved.

Our mission is clear:
To develop today’s state-of-the-art brake parts and setting the standards for tomorrow’s brake technology.

BIENVENUE DANS NOTRE UNIVERS

LA FRICTION EST UN ÉLÉMENT TROP IMPORTANT POUR LE CONFIER À D’AUTRES

C’est pourquoi nous gérons en interne tous les processus critiques, du développement des produits aux tests, au mélange et au pressage, en passant par le contrôle et l’emballage.

Pour nous, l’innovation, la productivité et l’assurance qualité sont des compétences clés.

Nous développons en permanence de nouveaux matériaux de friction, de nouveaux produits, de nouvelles méthodes de production et de nouvelles technologies. Nos lignes de production sont à la pointe de la technologie et toutes nos opérations sont hautement automatisées.

Tous nos flux de travail s’appuient sur le concept LEAN et se concentrent strictement sur les besoins de nos clients pour garantir une qualité supérieure en toutes circonstances, une flexibilité totale et des performances de livraison exceptionnelles. Nos équipes expérimentées et hautement qualifiées assurent un rendement optimal de tous les processus, du mélange des composés à l’emballage.

Les innovations permanentes de notre service R&D, tant en termes de matériaux que de technologies, permettent d’atteindre des performances exceptionnelles, des durées de vie prolongées, un confort accru et de fabriquer des produits de freinage respectueux de l’environnement.

Répondant aux besoins à la fois du marché de la 2ème monte et de l’équipement d’origine, nos produits sont tous homologués.

Notre mission est claire :
Développer des pièces de freinage à la pointe de la technologie d’aujourd’hui et définir les standards de la technologie de freinage de demain.

UNIQUE TECHNOLOGY FEATURES

NRS TECHNOLOGY (NUCAP RETENTION SYSTEM)

In order to attach a ceramic/organic friction material to the back plate, a type of adhesive is normally used. This adhesive needs to be very temperature stable, due to the elevated temperature which is measured in a brake system. Furthermore the appliance of the adhesive needs to be controlled very carefully in order to make sure that a consistent shear strength is achieved. However, no matter how good this is done there will always be an upper temperature limit where the adhesive will start to decompose and the risk of having a delamination between the back plate and the friction material will increase significantly.

Since SBS do not want to compromise on rider safety, NRS is used for all ceramic/organic friction materials made by SBS today including street, offroad and racing compounds.

Also for certain kinds of sintered pads this method is used (se under “conductive sintering”).

NRS technology is based on a matrix of hooks raised on the backing plate that mold into the friction material, creating an indestructible mechanical bond without any use of adhesives. The main advantages of NRS technology compared to traditional methods are:

// No separation between back plate and friction material
// No lifting edges of the friction material giving a firm lever feel
// No vibration between the friction material and back plate

CERAMIC/ORGANIC PRODUCTION TECHNOLOGY

Ceramic/organic materials are mainly used for smaller motorcycles and scooters, but was formerly the dominating brake material type.

The ceramic/organic friction material powder is fed into a hot cavity and pressure is applied together with the back plate featuring NRS retention technology. Due to a glue being included in the friction powder, it reacts and creates the friction material. After a certain time in the hot cavity the pad, including the back plate, is ejected and sent to a curing station, where the final curing of the friction material takes place.

DES TECHNOLOGIES UNIQUES

TECHNOLOGIE NRS (NUCAP RETENTION SYSTEM)

Pour fixer le matériau de friction céramique/organique sur le support, on utilise généralement un certain type d’adhésif. Cet adhésif doit être caractérisé par une grande stabilité thermique, en raison de la température élevée d’un système de freinage. De plus, l’application de l’adhésif doit être soigneusement contrôlée pour assurer une résistance au cisaillement uniforme. Pourtant, quel que soit l’adhésif et la procédure utilisés, il existe toujours une limite de température au-delà de laquelle l’adhésif commence à se décomposer, entraînant un fort risque de délaminage entre le support et le matériau de friction.

SBS ne souhaitant faire aucun compromis en matière de sécurité des pilotes, la technologie NRS est utilisée pour tous les matériaux de friction céramiques/organiques actuellement fabriqués par SBS, y compris les composés destinés aux motos routières, tout terrain et de course.

Cette technologie est également utilisée pour certains types de plaquettes frittées (voir la section « Frittage conducteur »).

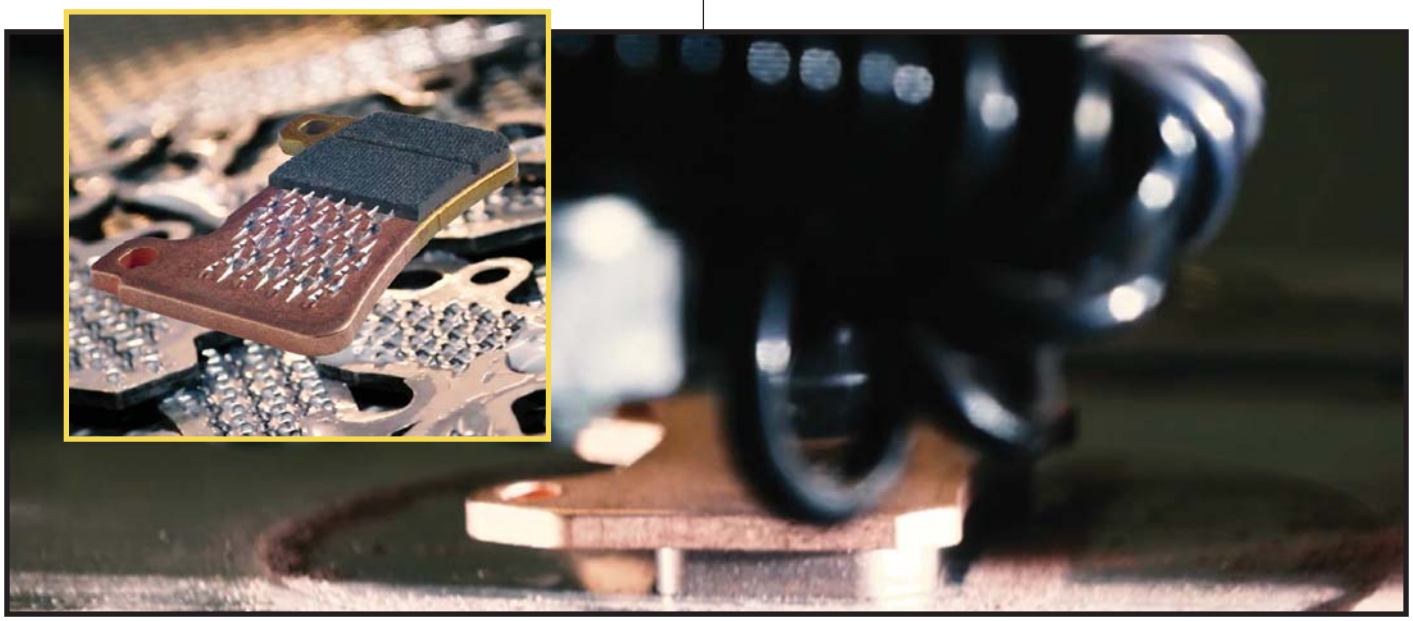
La technologie NRS est basée sur une matrice de crochets sur le support, qui viennent se mouler dans le matériau de friction, créant ainsi une liaison mécanique indestructible sans utiliser d’adhésif. Par rapport aux méthodes traditionnelles, les principaux avantages de la technologie NRS sont les suivants :

// Absence de séparation entre le support et le matériau de friction
// Absence de bords susceptibles de se soulever sur le matériau de friction et de provoquer un effet de levier
// Absence de vibrations entre le support et le matériau de friction

TECHNOLOGIE DE PRODUCTION CÉRAMIQUE/ORGANIQUE

Les matériaux céramiques/organiques sont aujourd’hui principalement utilisés pour les petites motos et les scooters, mais ils étaient auparavant le type de matériau le plus fréquemment utilisé.

Une poudre de matériau de friction céramique/organique est d’abord placée dans une cavité très chaude, puis une pression est exercée sur le support doté de la technologie NRS. Grâce à la colle intégrée à la poudre de friction, la réaction chimique qui se produit entraîne la création du matériau de friction. Après être restée quelques temps dans la cavité brûlante, la plaquette, y compris le support, est éjectée et envoyée dans une station de durcissement, où le matériau de friction finit de durcir.



UNIQUE TECHNOLOGY FEATURES

SINTERING PRODUCTION TECHNOLOGY

Many new motorcycles are equipped with sintered brake pads.

SBS uses two basic methods for sintering of friction materials:

Sintering in open belt furnace
Sintering of friction materials is very different compared to hot pressing of ceramic/organic friction materials. Typically the pressure used for sintered friction materials is 10 times higher compared to ceramic/organic friction materials.

In the sintering process the friction material slowly moves through an open belt furnace, where it is heated to 800°C, or more. During the time in the furnace, the metal particles melt together and creates a metal matrix - known as sintering. Within this metal matrix there are inclusions of abrasive or lubricating particles, which at the end creates the friction material. SBS brake pads produced in an open belt furnace are either brazed to the back plate or feature NRS technology for adhesion.

Conductive sintering
Conductive sintering or direct hot pressing is a technology based on the principle of heating up the material by electrical current. The advantages of this method is that it is very easy to control the sintering process resulting in an excellent and homogenous brake pad material quality.

For conductive sintered products, NRS retention technology is used.

DES TECHNOLOGIES UNIQUES

TECHNOLOGIE DE PRODUCTION DU FRITTAGE

Nombreuses sont les motos récentes qui sont équipées de plaquettes de frein frittées.

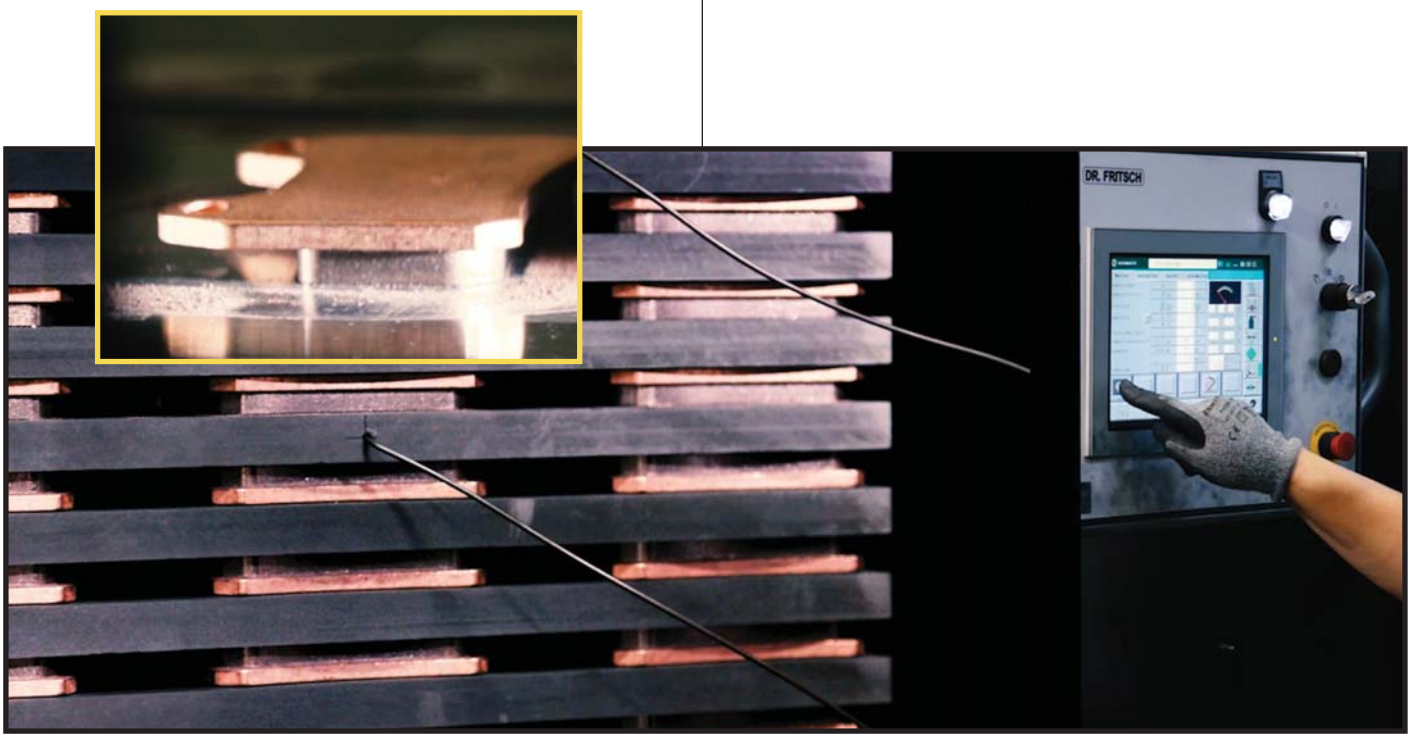
Pour le frittage des matériaux de friction, SBS utilise deux méthodes de base :

Frittage au four à tapis ouvert
Le frittage des matériaux de friction est très différent du pressage à chaud des matériaux de friction céramiques/organiques. Généralement, la pression utilisée pour fritter les matériaux de friction est 10 fois supérieure à celle utilisée pour les matériaux de friction céramiques/organiques.

Lors du processus de frittage, le matériau de friction se déplace lentement à travers un four à tapis ouvert, où il est chauffé à 800 °C ou plus. Durant le passage dans le four, les particules métalliques fondent et forment une matrice métallique. Ce processus est appelé frittage. Cette matrice métallique comprend des inclusions de particules abrasives ou lubrifiantes qui forment le matériau de friction. Les plaquettes de frein SBS produites dans un four à tapis ouvert sont alors brasées sur le plateau de frein ou assemblées à l'aide de la technologie d'adhérence NRS.

Frittage conducteur
Le frittage conducteur, ou pressage à chaud direct, est une technologie qui consiste à chauffer le matériau par un courant électrique. Les avantages de cette méthode sont qu'elle permet de contrôler facilement le processus de frittage et d'obtenir une qualité de matériau homogène et excellente.

Pour les produits frittés conducteurs, on utilise la technologie d'assemblage NRS.



UNIQUE TECHNOLOGY FEATURES

DEST

DEST technology means Dynamic Energy Surface Treatment. Used for DC racing compounds to ensure consistent fade-free performance from SBS production line. No thermal bedding-in is needed due to the DEST process which ensures degassing of the material to eliminate a gaseous film being created between disc and pad surface to occur loss of brake power (fade).

During the DEST scorching process the surface of the friction material is heated to around 700°C (1292°F). This means that a part of the pad is now decomposed to a certain depth and the amount of gases that will come out of the friction surface is reduced significantly.

COATING

SBS only uses coating materials and methods that protects the brake pads optimally against corrosion.

Ceramic/organic pads:
Powder coating with temperature stability up to 200-300°C

Sintered/carbon pads:
Copper – temperature stability of 900°C
Chromium-Nickel – temperature stability of 900°C

The thickness of the metallic coatings are typically 10-15 µm Corrosion-testing is performed according to the ISO 9227 NSS.

DES TECHNOLOGIES UNIQUES

DEST

La technologie DEST signifie Dynamic Energy Surface Treatment (traitement de surface à énergie dynamique). Utilisée pour les composés DC Racing, elle garantit des performances d'une fiabilité absolue dès la ligne de production SBS. Aucun rodage thermique n'est nécessaire grâce au processus DEST, qui assure un dégazage du matériau afin de supprimer le film gazeux qui se forme entre le disque et la surface de la plaquette et est susceptible d'altérer la puissance de freinage (fading).

Au cours du processus de vulcanisation DEST, la surface du matériau de friction est chauffée à environ 700 °C (1 292 °F). Ceci signifie qu'une partie de la plaquette est décomposée jusqu'à une certaine profondeur et que le volume de gaz qui se dégage de la surface de friction est réduit de manière significative.

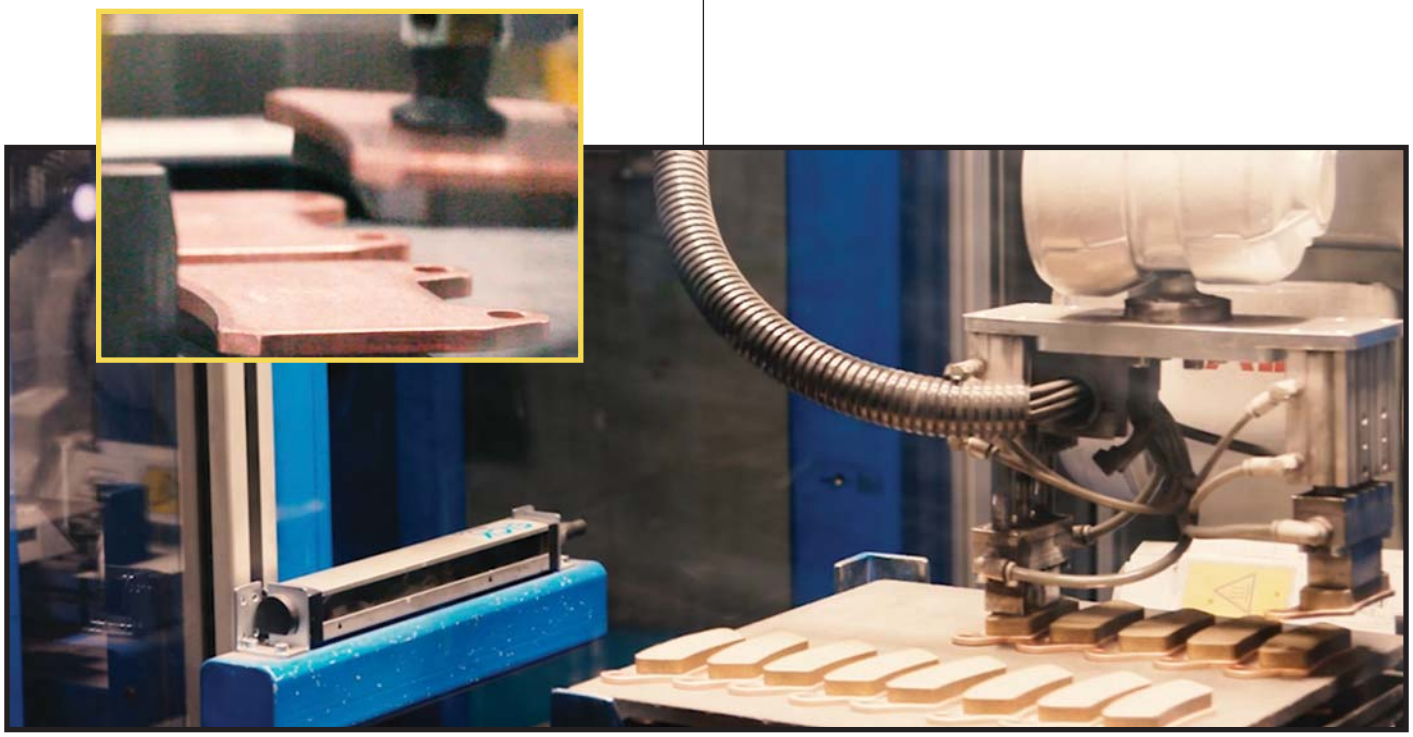
REVÊTEMENT

SBS utilise uniquement des matériaux et des méthodes de revêtement qui protègent efficacement les plaquettes de frein de la corrosion.

Plaquettes céramiques/organiques :
Revêtement en poudre avec stabilité thermique jusqu'à 200-300 °C

Plaquettes frittées/en carbone :
Cuivre – stabilité thermique de 900 °C
Nickel-Chrome – stabilité thermique de 900 °C

L'épaisseur des revêtements métalliques est généralement de 10-15 µm. Les tests de corrosion sont effectués conformément à la norme ISO 9227 NSS.



LICENSE TO ADVENTURE

If a street bike is the best you own. If you are dedicated to touring and adventures in weekends and holidays. If you enjoy the freedom of motorcycle riding. Or if you are commuting every day.

Then SBS STREET brake pads are the right choice for you. Our STREET compounds are developed to match all makes, models and age of street bikes in the market – front and rear.

They give you the performance, lifetime and comfort that you need to GO AHEAD.

Choose between:
// PERFORMANCE – HS / LS
// UPGRADE – SP
// STANDARD – HF

Follow our recommendations for the ideal pads for your bike.

Si votre moto de route est votre meilleure alliée. Si vous êtes friand de randonnées et d'aventures à moto pendant les week-ends et les vacances. Si vous aimez la liberté qu'offre la conduite d'une moto. Ou simplement si vous allez tous les jours travailler en moto.

Alors les plaquettes de frein SBS STREET sont faites pour vous. Nos composés STREET ont été développés pour s'adapter à toutes les marques, tous les modèles et toutes les générations de motos routières du marché, à l'avant comme à l'arrière.

Elles vous offrent les performances, la longévité et le confort dont vous avez besoin pour ALLER PLUS LOIN.

Choisissez entre les versions :
// PERFORMANCE – HS / LS
// UPGRADE – SP
// STANDARD – HF

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

sbs®

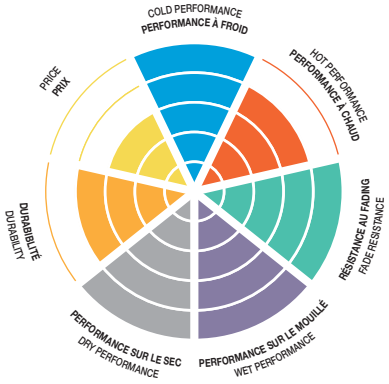
PERFORMANCE

HS - SINTER

FRONT / AVANT

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport, big touring and adventure bikes
// Sintered compound formulated for low wear, high thermal stability, excellent brake feel and easy modulation
// Class-leading and high performance, developed in racing and fine-tuned for street use
// Excellent for stainless steel or cast iron brake discs
// Front (HS) and rear (LS) compounds for ideal brake balance, to avoid rear wheel lock-up

// Composé de rechange Haute Performance pour motos équipées d'origine de plaquettes frittées.
// Conçu pour les motos modernes hautes performances sportives, routières ou destinées à l'aventure
// Composé fritté formulé pour une faible usure, une stabilité thermique élevée, une excellente sensation de freinage et une modulation facile.
// Composé aux performances supérieures exceptionnelles, conçu pour la compétition et la route.
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Composés avant (HS) et arrière (LS) offrant un équilibre de freinage parfait pour supprimer le risque de blocage de la roue arrière



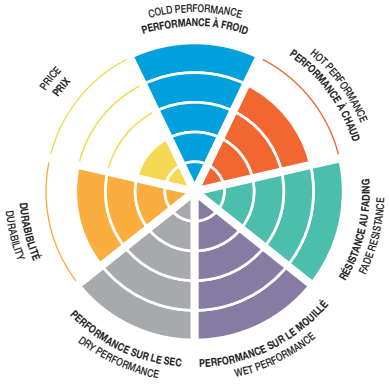
Brake performance diagrams to be compared individually within STREET compounds only.

LS - SINTER

REAR / ARRIÉRE

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport and big touring bikes
// Sintered compound offering predictable and controllable performance for rear wheel use
// Exclusive rear wheel compound formulated according to OEM concept offering ideal front/rear brake balance, to avoid over-braking and rear wheel lock-up

// Composé de rechange pour motos équipées d'origine de plaquettes frittées
// Conçu pour les motos modernes hautes performances, sportives et routières
// Un composé fritté destiné aux roues arrière offrant des performances prévisibles et contrôlables
// Composé exclusif pour les roues arrière, formulé selon le concept OEM et offrant un équilibre de freinage avant/arrière optimal pour éviter un freinage excessif et le blocage de la roue arrière.



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants STREET.

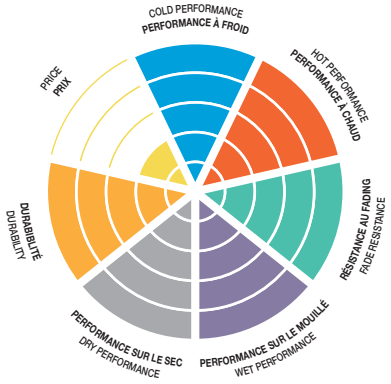
UPGRADE / STANDARD

SP - EVO SINTER

FRONT / AVANT

// OE replacement and upgrade compound for modern adventure & cruiser´s, high-performance roadsters, and sport & touring bikes
// State-of-the-art conductive sintered EVO compound formulated for strong initial bite to give instant brake feeling, easy modulation and powerful in-stop performance
// Fade free, consistent and reliable performance under extreme riding conditions and throughout brake pad lifetime
// High thermal stability in combination with long pad lifetime and very low brake disc wear
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Front (SP) and rear (LS) compounds for ideal brake balance, to avoid rear wheel lock-up

// Composé de rechange Haute performance pour les motos modernes Touring, les roadsters, les motos sportives et routières hautes performances
// Composé EVO fritté conducteur à la pointe de la technologie, formulé pour offrir un freinage instantané et puissant, et une modulation facile.
// Des performances fiables, uniformes et exemptes de fading même dans des conditions de conduite extrêmes et durant toute la durée de vie des plaquettes de frein
// Stabilité thermique élevée associée à une longue durée de vie des plaquettes et une très faible usure des disques de frein
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Composés avant (SP) et arrière (LS) offrant un équilibre de freinage parfait pour supprimer le risque de blocage de la roue arrière



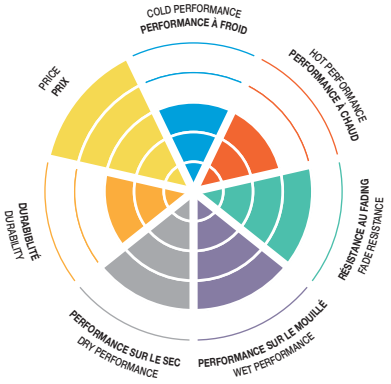
Brake performance diagrams to be compared individually within STREET compounds only.

HF - CERAMIC

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for bikes with non-sintered pads
// Designed for commuters, general-purpose street and cruiser bikes
// Ceramic compound offers long pad life, low dust and low brake disc/ rotor wear
// Excellent, consistent performance in wet and dry conditions
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Innovative noise-reduction technology for high comfort and low development of noise

// Composé de rechange pour motos équipées d'origine de plaquettes non frittées
// Conçu pour les motos effectuant des trajets quotidiens, les motos routières polyvalentes et celles destinées aux longs périples
// Composé céramique offrant une longue durée de vie, peu de poussière et une faible usure du disque de frein/rotor
// Excellentes performances uniformes dans toutes les conditions, sèches ou humides
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Technologie innovante de réduction du bruit pour un confort supérieur et une faible propagation du bruit



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants STREET.

LICENSE TO FREEDOM

If you have a passion for the American lifestyle, and the unique design and characteristics of the famous American motorcycle brands such as Harley Davidson, Buell and Indian, then SBS has the answer to your brake needs.

Our range of brake pads developed especially for American made motorcycles features compounds that unite high power with low noise and long lifetime. Our range has full coverage - vintage models back from the 80s as well as brand new American built bikes.

Choose between:
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Follow our recommendations for the ideal pads for your bike.

Si vous êtes passionné par le style de vie américain et par le design et les caractéristiques uniques des célèbres marques de motos américaines comme Harley Davidson, Buell et Indian, alors SBS a la solution qu'il vous faut en matière de freinage.

Notre gamme de plaquettes de frein spécialement conçue pour les motos américaines utilise des composés associant puissance élevée, bruit réduit et durée de vie prolongée. Notre gamme offre une couverture complète : des modèles vintage des années 80 aux toutes dernières motos des marques américaines.

Choisissez entre les versions :
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

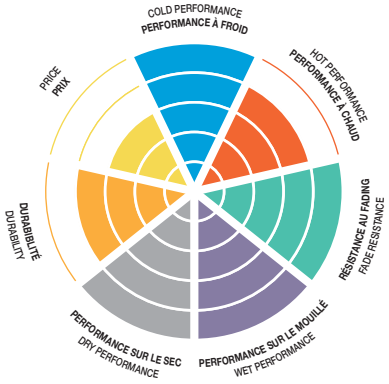
// Composé de rechange Haute Performance pour motos équipées d'origine de plaquettes frittées
// Conçu pour les motos modernes hautes performances, sportives et routières
// Composé fritté formulé pour une faible usure, une stabilité thermique élevée et une excellente sensation de freinage
// Composé aux performances supérieures exceptionnelles, développé pour la compétition et la route
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Composés avant (H.HS) et arrière (H.LS) offrant un équilibre de freinage parfait pour supprimer le risque de blocage de la roue arrière



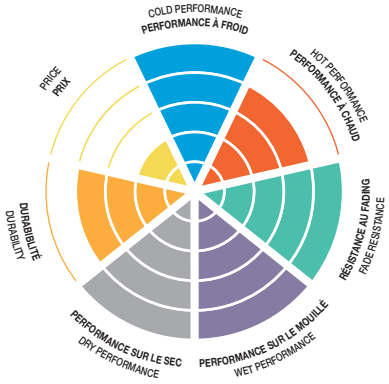
Brake performance diagrams to be compared individually within AMERICAN compounds only.

H.LS - SINTER

REAR / ARRIÉRE

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport and big touring bikes
// Sintered compound offering predictable and controllable performance for rear wheel use
// Exclusive rear-wheel compound formulated according to OEM concept, to offer ideal front/rear brake balance, to avoid over-braking and rear wheel lock-up

// Composé de rechange pour motos équipées d'origine de plaquettes frittées
// Conçu pour les motos modernes hautes performances, sportives et routières
// Un composé fritté destiné aux roues arrière offrant des performances prévisibles et contrôlables
// Composé exclusif pour les roues arrière, formulé selon le concept OEM et offrant un équilibre de freinage avant/arrière optimal pour éviter un freinage excessif et le blocage de la roue arrière



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants AMERICAN.

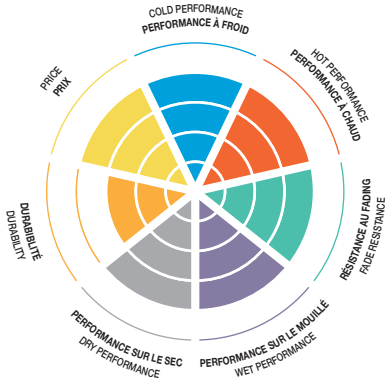
HIGH POWER & NOISE REDUCTION FORMULA / ULTRA QUIET & LOW DUST

H.CT - CARBON

FRONT / AVANT • REAR / ARRIÉRE

// Performance upgrade compound, excellent for bikes with customized brake system and discs
// Compatible with stainless steel, cast iron, chromed and polished brake discs
// HH-rated performance, developed in racing and fine-tuned for street use
// Unmatched feel and control at brake lever in wet and dry conditions
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Composé Haute Performance, idéal pour les motos dotées de disques et de systèmes de frein personnalisés
// Compatible avec les disques de frein en acier inoxydable, en fonte, chromés et polis
// Composé aux performances de classe HH, conçu pour la compétition et adapté à la conduite routière
// Des sensations et un contrôle inégalés au niveau du levier de frein dans toutes les conditions, sèches ou humides
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé



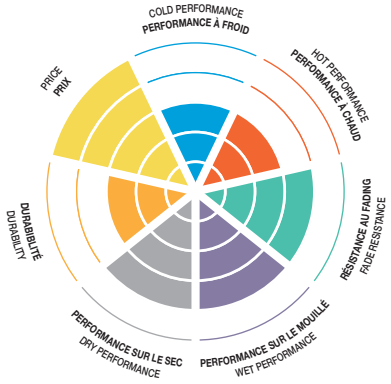
Brake performance diagrams to be compared individually within AMERICAN compounds only.

H.HF - CERAMIC

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for bikes with non-sintered pads
// Designed for commuters, general-purpose street and cruiser bikes
// Ceramic compound offers long pad life, low dust and low brake disc/rotor wear
// Excellent, consistent performance in wet and dry conditions
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Innovative noise-reduction technology for high comfort and low development of noise

// Composé de rechange pour motos équipées d'origine de plaquettes non frittées
// Conçu pour les motos effectuant des trajets quotidiens, les motos routières polyvalentes et celles destinées aux longs périples
// Composé céramique offrant une longue durée de vie, peu de poussière et une faible usure du disque de frein/rotor
// Excellentes performances uniformes dans toutes les conditions, sèches ou humides
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Technologie innovante de réduction du bruit pour un confort supérieur et une faible propagation du bruit



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants AMERICAN.

LICENSE TO FUN

When it comes to city traffic, a scooter is often the ideal vehicle. In the dense traffic you have to rely on your brakes. The SBS scooter brake pads offer the ideal brake performance and durability for this environment.

We offer different compounds for different kind of scooters and riding needs. Our market coverage is wide with pads and compounds from small 50 ccm models to modern, high performance maxi scooters.

Choose between:
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Follow our recommendations for the ideal pads for your scooter.

En ville, le scooter est souvent le véhicule idéal. Quand la circulation est dense, vous devez pouvoir compter sur vos freins. Les plaquettes de frein SBS Scooter offrent les performances de freinage et la longévité idéales pour cet environnement.

Nous proposons différents composés en fonction des différents types de scooters et de besoins. Notre gamme couvre tout le marché, allant des petits modèles 50 cm³ jusqu'aux maxi scooters modernes hautes performances.

Choisissez entre les versions :
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Suivez nos recommandations pour trouver les plaquettes idéales pour votre scooter.

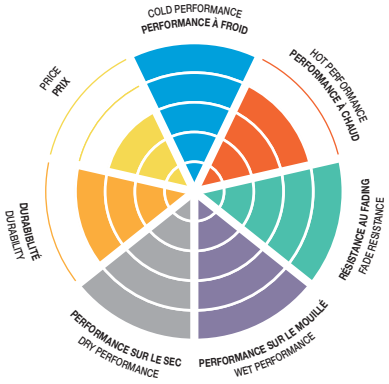
MAXI SINTER / STANDARD & MAXI

MS - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// High performance upgraded sintered compound for Maxi scooters from 250 ccm and up
// Recommended for Maxi scooters equipped with motorcycle technology
// State-of-the-art sintered compound formulated for low wear, high thermal stability and excellent brake feel

// Composé fritté Haute performance destiné aux maxi scooters de 250 cm³ et plus
// Recommandé pour les maxi scooters équipés d'une technologie type moto
// Composé fritté à la pointe de la technologie formulé pour une faible usure, une stabilité thermique élevée et une excellente sensation de freinage



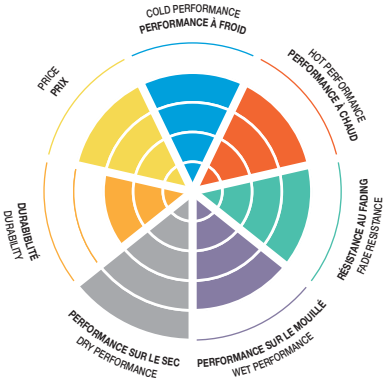
Brake performance diagrams to be compared individually within SCOOTER compounds only.

CT - CARBON

FRONT / AVANT • REAR / ARRIÉRE

// Performance upgrade carbon compound for medium size scooters 125-249 ccm
// Recommended for sporty riding, everyday transportation and fun
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Composé carbone Haute Performance destiné aux scooters de taille moyenne (125 à 249 cm³).
// Recommandé pour la conduite sportive, les trajets quotidiens et le plaisir
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants SCOOTER.

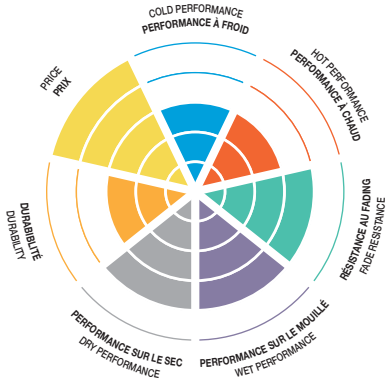
STANDARD & MAXI

HF - CERAMIC

FRONT / AVANT • REAR / ARRIÉRE

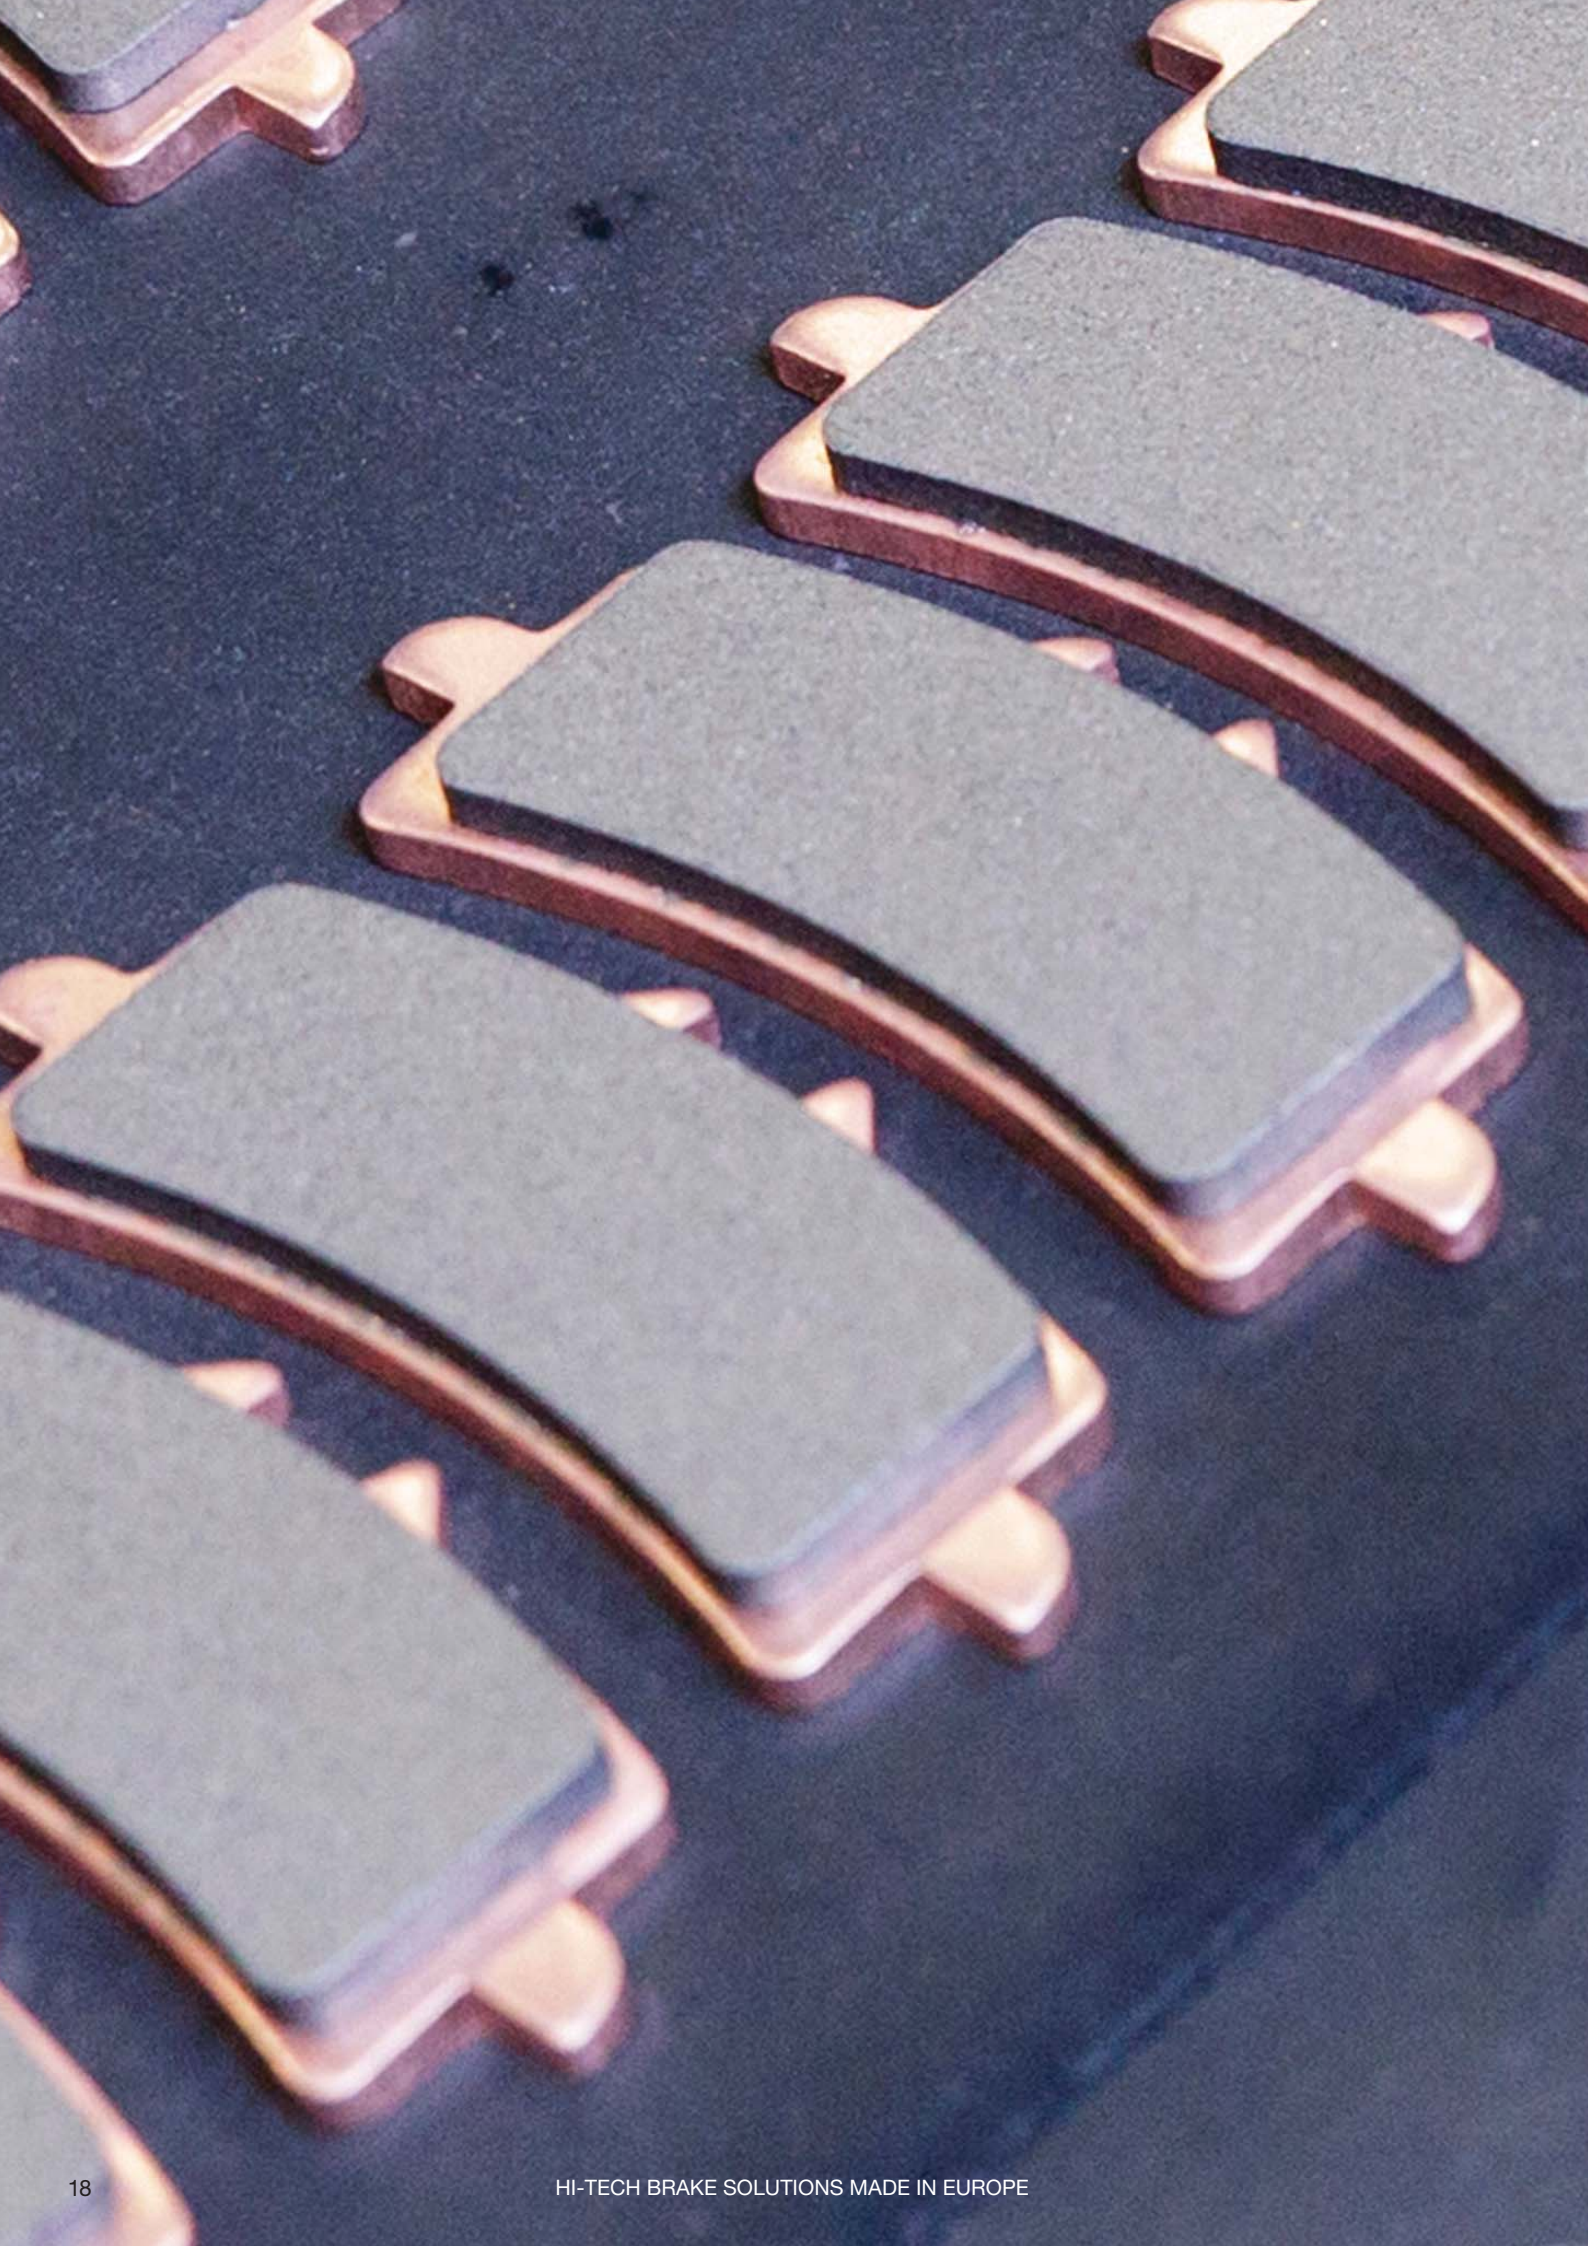
// OE replacement ceramic compound for small and medium size scooters 50-124 ccm
// Recommended for commuters and general-purpose street riding
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Composé céramique de rechange destiné aux scooters de taille petite à moyenne (50-124 cm³)
// Recommandé pour les trajets quotidiens
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé



Brake performance diagrams to be compared individually within SCOOTER compounds only.

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants SCOOTER.



LICENSE TO WIN

KENAN SOFUOGLU

For more than 25 years racing has been part of our DNA.

Through our Partners in Racing concept, we deliver the stopping power to the best of the best in racing. Whether it comes to international top level road racing such as Superbike, Supersport or Endurance, national competitions, track days or classic road racing, SBS offers you the brake pads you need for winning important 100th of seconds when braking. Our race compounds are specially developed for competition and race track use – tested and approved by some of the best World Championship riders.

Choose between:
// ROAD RACING & ENDURANCE – DS
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RS
// RACING REAR – RQ / LS

Follow our recommendations for the ideal pads for your bike.

Depuis plus de 25 ans, la course fait partie de notre ADN.

À travers notre concept « Partenaires de compétition », nous offrons LE top freinage aux meilleurs teams et pilotes. Qu'il s'agisse des courses sur circuits les plus prestigieuses comme le Mondial Superbike, Supersport ou Endurance, les compétitions nationales, les journées circuit ou les classiques routières, SBS vous propose les plaquettes de frein dont vous avez besoin pour gagner d'importants 100èmes de seconde au freinage. Nos composés de course sont spécialement conçus pour la compétition et les circuits. Ils sont testés et approuvés par les plus grands pilotes du Championnat du Monde.

Choisissez entre les versions :
// ROAD RACING & ENDURANCE – DS
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RS
// RACING REAR – RQ / LS

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

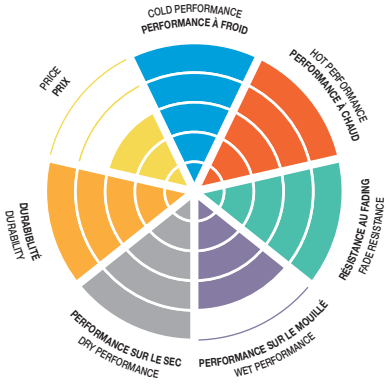
ROAD RACING & ENDURANCE / ENDURANCE, CLASSIC RACING & ROAD RACING

DS - DUAL SINTER

FRONT / AVANT - FOR RACE USE ONLY

// The choice of numerous World Champions in Superbike, Supersport, Moto2 and Endurance
// High-tech sintered compound available for racing & standard brake systems used in racing
// High initial bite, linear and strong in-stop performance, consistent performance with excellent brake feel and control
// Excellent pad life for Endurance racing
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le choix de nombreux champions du monde en Superbike, Supersport, Moto2 et Endurance
// Composé fritté haute technologie adapté aux systèmes de freinage de course et standard utilisés en compétition
// Mordant élevé, performances de freinage impressionnantes et uniformes avec une excellente sensation de freinage et un contrôle inégalé
// Excellente durée de vie des plaquettes pour les courses d'endurance.
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé



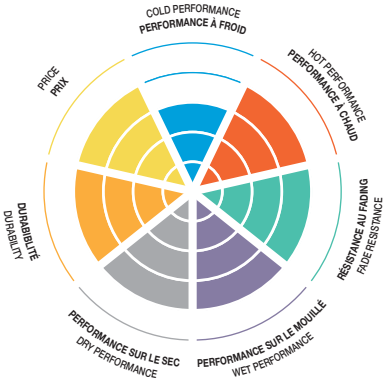
Brake performance diagrams to be compared individually within RACING compounds only.

DC - DUAL CARBON

FRONT / AVANT - FOR RACE USE ONLY

// The upgrade choice for Superbike, Supersport and Superstock racers in National Championship as well as for Track Day riders
// High-tech carbon compound developed for racing and standard brake systems used for race and sport bikes
// Low heat transfer rate protects brake system and brake fluid against extreme temperatures
// Smooth initial bite, progressive in-stop performance with excellent brake lever feel and modulation
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le composé de choix pour les pilotes de Superbike, Supersport et Superstock des championnats nationaux mais aussi pour les journées sur circuit ("Track days")
// Composé carbone haute technologie développé pour les systèmes de freinage de course et standard utilisés sur les motos de compétition et sportives
// Le faible taux de transfert de chaleur protège le système de freinage et le liquide de frein contre les températures extrêmes
// Mordant fluide, performances de freinage progressives avec une excellente sensation au niveau du levier de frein et une excellente modulation
// Technologie DEST utilisée pour la pré-application du composé afin d'éliminer le fading et d'assurer des performances uniformes.
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants RACING.

ENDURANCE, CLASSIC RACING & ROAD RACING / ROAD RACING & TRACKDAYS

DCC - DUAL CARBON

FRONT / AVANT - FOR RACE USE ONLY

// The choice for classic road racing derived from more than 25 years of experience in World Championship racing and inspired by our championship winning DC Dual Carbon material
// Smooth initial bite, ideal for classic front fork construction and tires. Progressive brake performance offering superior power and front-end feel
// Thermal stability, suitable for 1 & 2 disc set-up. Compatible with stainless steel and cast iron brake discs
// Low thermal conductivity reduces thermal load to seals, brake fluid and caliper parts
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le choix qui s'impose pour les courses classiques sur route s'appuie sur plus de 25 ans d'expérience en Championnat du monde, inspiré par notre matériau carbone gagnant DC Dual Carbon
// Mordant fluide, idéal pour les fourches et les pneus avant classiques. Performances de freinage progressives offrant une puissance supérieure et une sensation avant-arrière optimale
// Stabilité thermique, adaptée aux configurations à 1 et 2 disques. Compatible avec les disques de frein en acier inoxydable et en fonte
// Faible conductivité thermique réduisant la charge thermique exercée sur les joints, le liquide de frein et les pièces des étriers
// Technologie DEST utilisée pour la pré-application du composé afin d'éliminer le fading et d'assurer des performances uniformes.
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Due to the unique nature of the DCC compound, formulated especially for vintage racing, it is not possible to compare to other products.

En raison de la nature unique du composé DCC, formulé spécialement pour les courses de motos vintage, toute comparaison avec d'autres produits est impossible.

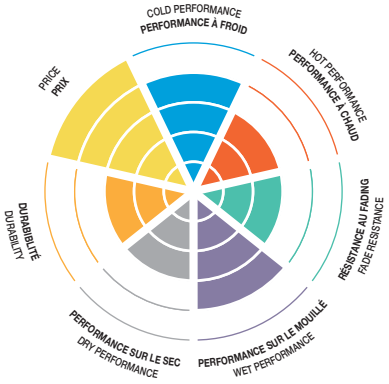
Brake performance diagrams to be compared individually within RACING compounds only.

RS - SINTER

FRONT / AVANT

// The ideal and affordable choice for track days and for combined road and track bike
// Sintered compound available for modern sport- and cup-bike standard brake systems
// Excellent for stainless steel or cast iron brake discs
// Strong initial bite, linear in-stop performance with good brake feel and control

// Le choix économique idéal pour les journées sur pistes (track days) et les motos combinant pistes et routes
// Composé fritté adapté aux systèmes de freinage standard des motos sportives et de course modernes
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Mordant puissant, performances de freinage avec une bonne sensation de freinage et un contrôle maîtrisé



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants RACING.

ENDURANCE, CLASSIC RACING & ROAD RACING

RQ - CARBON TECH

REAR / ARRIÉRE

// Rear brake carbon compound with high brake performance
// Excellent feel and control to use rear brake steering into turns and handle the bike out of turns

// Composé carbone pour frein arrière offrant d'impressionnantes performances de freinage
// Excellente sensation et contrôle aisé du frein arrière dans les virages, offrant une parfaite maîtrise de la moto en sortie de virage

LS - SINTER

REAR / ARRIÉRE

// Rear brake sintered compound with medium brake performance and long pad life
// Recommended for riders using the rear brake occasionally or only slightly entering the turns

// Composé fritté pour frein arrière offrant des performances de freinage intermédiaires et une longue durée de vie de plaquettes.
// Recommandé pour les motards utilisant occasionnellement le frein arrière ou légèrement à l'entrée des virages.

LICENSE TO ACTION

Enjoying the freedom in the desert. Conquering rocks and mountains. Racing down the dirt track for podium positions.

When riding off road is your passion, SBS offers you the ideal brake compound for the aggressive environment of sand, dust, mud and water. Whether on motorcycle, ATV or UTV.

Choose between our racing pads for competition at all levels or the alternatives when riding off road for leisure and fun. Our range covers all off road makes and models and of course for both front and rear applications.

Choose between:
// RACING – RSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Follow our recommendations for the ideal pads for your bike.

Apprécier la liberté dans le désert. Conquérir les collines et les montagnes. Avaler les kilomètres de pistes poussiéreuses jusqu'au podium.

Si la conduite hors des sentiers battus est votre passion, SBS propose un composé de frein idéal pour les environnements agressifs mêlant sable, poussière, boue et eau. Que ce soit pour les motos, les quads ou autres VU Tout Terrain.

Choisissez parmi nos plaquettes spéciales course pour la compétition à tous les niveaux ou d'autres versions adaptées à la conduite tout terrain pour les loisirs et le plaisir. Notre gamme couvre toutes les marques et tous les modèles tout terrain, à la fois pour les applications avant et arrière.

Choisissez entre les versions :
// RACING – RSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

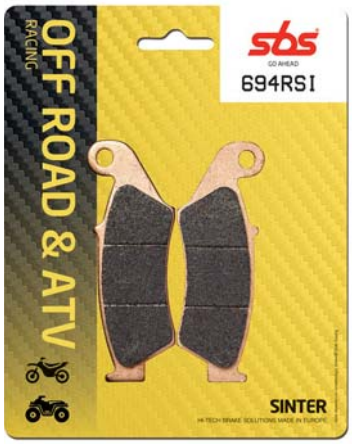
RACING / CLUB, TRAILS & LEISURE



RSI - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// Performance upgrade choice of MX GP World Championship MX GP and MX2 teams and riders
// Sintered compound formulated for high thermal stability, powerful and predictable fade-free performance
// Compatible with OE standard brake discs and specially designed racing discs

// Le choix Haute Performance des teams et des pilotes du Championnat du monde MX GP et MX2
// Composé fritté formulé pour une stabilité thermique élevée, une puissance supérieure et des performances prévisibles sans fading
// Compatible avec les disques de frein OE standard et les disques spécialement conçus pour la course.

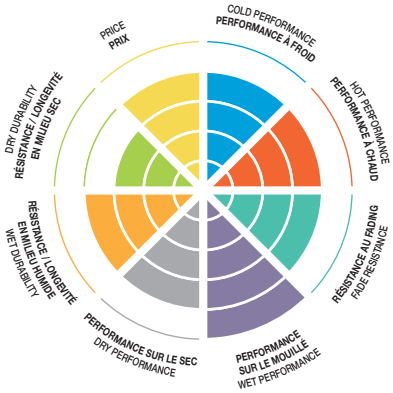
Brake performance diagrams to be compared individually within OFF ROAD compounds only.

SI - SINTER

FRONT / AVANT • REAR / ARRIÉRE

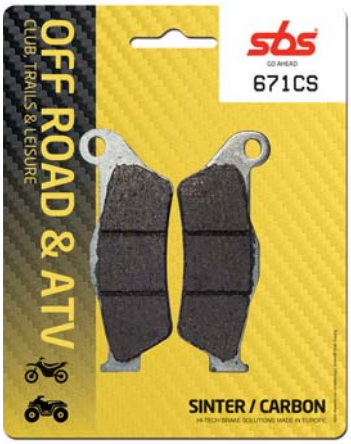
// The upgrade choice for muddy, wet or sandy conditions
// Sintered compound formulated for extended service intervals, high performance and easy modulation
// Class-leading smooth performance developed in racing under severe conditions

// Le choix idéal pour la boue, les terrains humides et le sable
// Composant fritté formulé pour des intervalles d'entretien prolongés, des performances élevées et une modulation facile
// Composé aux performances d'une fluidité inégalée, conçu pour la compétition dans les conditions les plus difficiles



Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants OFF ROAD.

CLUB, TRAILS & LEISURE

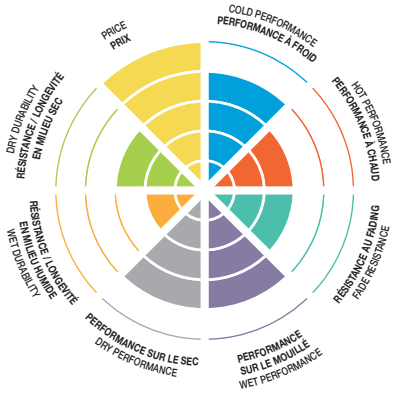


CS - CARBON

FRONT / AVANT • REAR / ARRIÉRE

// Affordable replacement choice for hobby motocross and competition
// Carbon compound offers smooth, quiet and non-grabbing performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Composé de rechange abordable, idéal pour le motocross de loisir et de compétition
// Composé carbone offrant des performances fluides, silencieuses et sans broutage
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé



Brake performance diagrams to be compared individually within OFF ROAD compounds only.

ATS - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for combination with plain steel brake discs
// Sintered compound compatible with OE standard plain steel brake discs as used with older Arctic Cat & Polaris ATV models

// Composé de rechange à associer à des disques de frein en acier
// Composé fritté compatible avec les disques de frein en acier standard d'origine comme ceux utilisés sur les anciens modèles de quads Arctic Cat et Polaris

ATS is a performance upgrade to be used with plain steel discs on certain Polaris and Arctic Cat models, so its special formula cannot be compared to other compounds.

Les composés ATS sont des produits hautes performances destinés à être utilisés avec les disques de frein en acier ordinaire de certains modèles Polaris et Arctic Cat. Leur formulation spéciale ne permet pas de les comparer à d'autres composés.

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants OFF ROAD.

BRAKE SHOES WITH SPRINGS

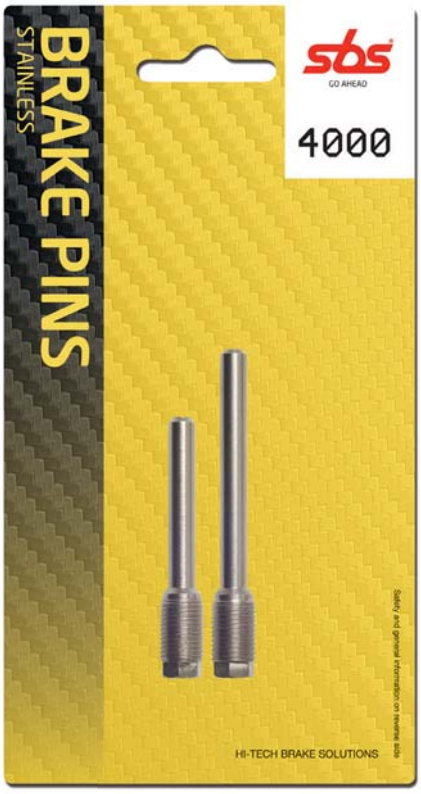
MÂCHOIRES DE FREIN À RESSORTS

Asbestos-free brake lining for superior performance and durability under all weather conditions. High grade alloy for superior strength. Surface treated against corrosion. Brake shoe springs made of high quality spring wire steel according to DIN 17223 specifications for max. flexibility.

Garniture de frein sans amiante pour des performances et une longévité supérieures quelles que soient les conditions météo. Alliage haute qualité pour une résistance supérieure. Surface traitée contre la corrosion. Ressorts de mâchoires de frein fabriqués en fil d'acier conforme à la norme DIN 17223 pour une flexibilité maximale.

STAINLESS BRAKE PINS

AXES DE FREIN INOXYDABLES



The SBS stainless brake pin range covers the most common MX and Enduro bikes from the early 1990s until today.

The range comprises 5 complete sets, front and rear together, but are also available as single packs with only front or rear to the respective model. Brake pad pins get wear grooves after a while so it is recommended to replace them regularly in order to prevent stiction and poor performance.

// Made of high quality stainless steel 304
// 8 mm hex head for quick and easy change of brake pad (excl. ref 4003)
// Corrosion resistant
// Smooth sliding between pin and brake pads

La gamme d'axes de frein inoxydables SBS est adaptée aux motos MX et Enduro les plus courantes du début des années 1990 à aujourd'hui.

Cette gamme comprend 5 jeux complets, avant et arrière, également disponibles en packs unitaires contenant uniquement un axe avant ou arrière du modèle souhaité. Comme les axes des plaquettes de frein développent des rainures d'usure après un certain temps, il est recommandé de les remplacer régulièrement afin d'éviter le frottement au démarrage et de faibles performances.

// Acier inoxydable de haute qualité "304"
// Tête hexagonale de 8 mm pour un changement rapide et facile des plaquettes de frein (sauf réf. 4003)
// Résistance à la corrosion
// Glissement fluide des axes contre les plaquettes de freins

ACCESSORIES

BRAKE SYSTEM BLEEDER

Motorcycle brake system bleeder which allows quick, safe and clean exchange of brake fluid. Access to min. 6 bar air pressure is necessary. The bleeder is made of the best and most durable brake fluid resistant materials which means that it handles the highly corrosive brake fluid in a closed circuit. A special safety and “tip-over” valve, prevents the fluid to atomize when the container is full.

// Built-in ”tip-over” valve
// Turnable line fitting
// Additional 2-nipple line included
// Manual in 12 languages

Part number 3908
EPDM rubber units
Art. number 3916.10 (10 pcs.)

PURGEUR DE FREIN

Purgeur de système de freinage de moto permettant une vidange rapide, propre et sûre du liquide de frein. Nécessite de l’air comprimé à 6 bars minimum. Le purgeur est fabriqué avec les matériaux les plus durables résistant au liquide de frein, car il doit pouvoir supporter le liquide de frein hautement corrosif du circuit fermé. Une valve de sécurité spéciale « anti-refoulement » empêche le liquide de se vaporiser lorsque le réservoir est plein.

// Valve « anti-refoulement » intégrée
// Sens de fixation réversible
// Fourni avec 2 embouts supplémentaires
// Manuel disponible dans 12 langues

Réf. 3908
Embouts en caoutchouc EPDM
Réf. 3916.10 (10 pièces)

ACCESOIRES

ANTI-NOISE SHIMS

// Vibration/noise resistant
// Temperature transfer resistant
// Piston protective
// Better brake feel
// Do not use for racing

Part number 9500

SHIMS POUR PLAQUETTES DE FREIN

// Résistants aux vibrations/bruit
// Résistants au transfert de température
// Protection du piston
// Sensations de freinage améliorées
// Ne pas utiliser pour la course

Part number 9500

sbs®
THE POWER TO STOP YOU®

BRAKE PADS FOR ALL YOUR POWERSPORT NEEDS - MADE IN DENMARK

facebook.com/sbsbrakes | sbs.dk

HI-TECH BRAKE SOLUTIONS MADE IN EUROPE

At SBS, we develop and manufacture hi-tech brake solutions.

Our ranges of brake pads, brake discs, brake shoes and other important parts cover all relevant motorcycles, scooters and ATV/UTVs on the market, regardless of make and model. SBS is your single source for brake parts and components.

We are a global market leader within brakes for powered two-wheelers. Our R&D department continuously innovates with new materials and technologies to achieve ultimate performance, longer lifetime, higher comfort and more eco-friendly products.

Our products are tested by reality. Dynamometer testing is supplemented with numerous street and race track tests. We work together with some of the world's best road racing and motocross riders, when they race towards podium positions.

We create the power to stop you. Made in Europe. You decide where and how to use it. Go Ahead!
